Infection Control & Decontamination for Ambulances & A&E Departments

The Tronic A2Z System uses the latest “dry mist” technology to disperse Trionic A2Z high level disinfectant solution to all surfaces. Esense Antimicrobial Hand Sanitising Foam Rub and Trionic’D Disinfectant Wipes provide a safer working environment for Ambulance crews, A&E staff & for patients.

Ebiox advanced decontamination technology for ambulances is a unique and highly effective range of cleaning and disinfection products that represent the latest advances in technology.

Each product in the comprehensive range has been specifically designed to assist in the control of potentially harmful pathogens and reduce the risk of cross infection.

Cleaning is the necessary and essential first step of any disinfection process. It is needed to render the environmental surface safe to handle or use by removing organic matter, salts, and visible soils - all of which interfere with microbial inactivation. Tronic is designed to Clean and Disinfect Environmental Surfaces or Medical Equipment.

“Ebiox wipes were effective, in less than one minute, in reducing micro-organisms to a threshold below which it was not possible to accurately measure their viability”
Independent test - Q Labs.

All Ebiox products are manufactured in accordance with an ISO 9001 approved Quality Management System and have been tested and approved to international quality standards. Referenced data is available on request.
